

Output Formats

The output of T3D can be split into several categories. There is the *main output*, which is the product of the documentation process, and, in the general perception, comes in the form of multiple HTML files and several XML files, which store extracted data in an intermediate format and serve as a basis for the documentation generation. Then there is also the output of the documentation generation process itself, which will be referred to as the *documentation generation log*. The details follow below.
