# Features

Main features of the tools are outlined below. For in-depth description, please refer to the <u>documentation pages</u>

## T3Q

- Automated guideline checking
    - ♦ Naming conventions
    - ♦ Structure of data guidelines
    - ♦ Log statement guidelines
    - ♦ Code style guidelines
    - ♦ Modularization guidelines
- Listing of direct dependencies on the module level
- Automated batch code formatting
- Flexible configuration
    - ♦ Separate configuration profiles (e.g for different projects)

## T3D

- Automated documentation generation in HTML format
    - ♦ Three views - source view, dependencies between module parameter and test cases, import relations between modules
    - ♦ Customizable HTML output presentation with CSS
    - ♦ Simplified printable version
    - ♦ Customizable documentation tag names

⬥ Relevant data extracted and stored in intermediate XML format

⬥ Additional output formats possible

• Documentation consistency checks (e.g. empty tags, misplaced tags, identical tags, etc.)

• Automated local-dependency generation

• Flexible configuration

• Separate configuration profiles (e.g for different projects)
