

# Unicode Support in Trac

## Error: Macro TracGuideToc(None) failed

```
'NoneType' object has no attribute 'find'
```

Trac stores all text using UTF-8 encoding, including text in tickets and wiki pages. Internal processing of text uses true Unicode representations.

As such, it supports most (all?) commonly used character encodings.

If the default encoding in your source code repository is not UTF-8, you can specify it in the [trac.ini](#), for example:

```
default_charset = gbk
```

You also must make sure that your [database backend](#) stores its data in UTF-8; otherwise strange things will happen.

To convert your database to UTF-8, the easiest way is to dump the database, convert the dump into UTF-8 and then import the converted dump back into the database.

You can use [iconv](#) to convert the dump.

## Examples

### Arabic

???? ???? ???? ?? ??????? ?????????? ???? UTF-8? ??? ?? ??? ????????? ?????????? ?? ????? ?????? ???????.

### Bulgarian

????????????? ???? ?????? ???

### Česky

Čeština v kódování UTF-8, žádný problém.
